D&PKR Enterprises Investors' Pitch

- We are opening a sports book

Sports books are legal now

- We are opening a sports book
- Betting on sports: How it works

- We are opening a sports book
- Betting on sports: How it works
  - Example: Bulls -200
    - Bet 2 dollars to win 1 dollar.

Sports books are legal now

- We are opening a sports book
- Betting on sports: How it works
  - Example: Bulls -200
    - Bet 2 dollars to win 1 dollar.
  - Example: Bulls +4
    - Bet 1 dollars to win 1 dollar.

Sports books are legal now

- We are opening a sports book
- Betting on sports: How it works
  - Example: Bulls -200
    - Bet 2 dollars to win 1 dollar.
  - Example: Bulls +4
    - Bet 1 dollars to win 1 dollar.
- Goal: Equal Money Bet on both Sides

Sports books are legal now

- We are opening a sports book
- Betting on sports: How it works
  - Example: Bulls -200
    - Bet 2 dollars to win 1 dollar.
  - Example: Bulls +4
    - Bet 1 dollars to win 1 dollar.
- Goal: Equal Money Bet on both Sides
- How: Modeling

Sports books are legal now

  - Example: Bulls -200
    - Bet 2 dollars to win 1 dollar.
  - Example: Bulls +4
    - Bet 1 dollars to win 1 dollar.
- Goal: Equal Money Bet on both Sides
- How: Modeling
- Statistics on just under 10,000 NBA games taken from 2014-2018

- The Features

	FieldGoals	FieldGoalsAttempted	FieldGoals.	X3PointShots	X3PointShotsAttempted	X3PointShots.	FreeThrows	FreeThrowsAttempted	FreeThrows.
1	40	80	0.5	13	22	0.591	9	17	0.529

- The Features

	FieldGoals	FieldGoalsAttempted	FieldGoals.	X3PointShots	X3PointShotsAttempted	X3PointShots.	FreeThrows	FreeThrowsAttempted	FreeThrows.
1	40	80	0.5	13	22	0.591	9	17	0.529

- Total of 39 statistics incorporated

- The Features

	FieldGoals	FieldGoalsAttempted	FieldGoals.	X3PointShots	X3PointShotsAttempted	X3PointShots.	FreeThrows	FreeThrowsAttempted	FreeThrows.
1	40	80	0.5	13	22	0.591	9	17	0.529

- Total of 39 statistics incorporated
- Initial model: A Decision Tree

- The Features

	FieldGoals	FieldGoalsAttempted	FieldGoals.	X3PointShots	X3PointShotsAttempted	X3PointShots.	FreeThrows	FreeThrowsAttempted	FreeThrows.
1	40	80	0.5	13	22	0.591	9	17	0.529

- Total of 39 statistics incorporated
- Initial model: A Decision Tree
  - Basic idea: Make decisions

- The Features

1	40	80	0.5	13	22	0.591	9	17	0.529

- Total of 39 statistics incorporated
- Initial model: A Decision Tree
  - Basic idea: Make decisions
  - Splitting Criterion

- ROC AUC Score
  - ROC curve is the ratio of the true positive and false positive rates

Evaluating and Improving

- ROC AUC Score
  - ROC curve is the ratio of the true positive and false positive rates
  - Base Model's Score: .81

- ROC AUC Score
    - ROC curve is the ratio of the true positive and false positive rates
    - Base Model's Score: .81
- Considered Other Models and Random Forest was the Best

Evaluating and Improving

- ROC AUC Score
  - ROC curve is the ratio of the true positive and false positive rates
  - Base Model's Score: .81
- Considered Other Models and Random Forest was the Best
- Tuning Parameters

Evaluating and Improving

- ROC AUC Score
  - ROC curve is the ratio of the true positive and false positive rates
  - Base Model's Score: .81
- Considered Other Models and Random Forest was the Best
- Tuning Parameters
- New ROC AUC score

Evaluating and Improving

- ROC AUC Score
  - ROC curve is the ratio of the true positive and false positive rates
  - Base Model's Score: .81
- Considered Other Models and Random Forest was the Best
- Tuning Parameters
- New ROC AUC score
  - .95
- Sanity Check: Feature Importance

Evaluating and Improving

- ROC AUC Score
  - ROC curve is the ratio of the true positive and false positive rates
  - Base Model's Score: .81
- Considered Other Models and Random Forest was the Best
- Tuning Parameters
- New ROC AUC score
  - .95
- Sanity Check: Feature Importance
  - Field Goal Percentage and Opponent Field Goal Percentage Most Important

Evaluating and Improving

- ROC AUC Score
    - ROC curve is the ratio of the true positive and false positive rates
    - Base Model's Score: .81
- Considered Other Models and Random Forest was the Best
- Tuning Parameters
- New ROC AUC score
    - .95
- Sanity Check: Feature Importance
    - Field Goal Percentage and Opponent Field Goal Percentage Most Important
    - Team and Opponent Assists

Evaluating and Improving

- ROC AUC Score
  - ROC curve is the ratio of the true positive and false positive rates
  - Base Model's Score: .81
- Considered Other Models and Random Forest was the Best
- Tuning Parameters
- New ROC AUC score
  - .95
- Sanity Check: Feature Importance
  - Field Goal Percentage and Opponent Field Goal Percentage Most Important
  - Team and Opponent Assists
  - Team Three pointers

- Look at season average statistics to predict individual games

Next Steps

- Look at season average statistics to predict individual games
- Develop betting lines based on win percentage
- Individualized Statistics over Team Statistics

- Look at season average statistics to predict individual games
- Develop betting lines based on win percentage
- Individualized Statistics over Team Statistics
- Season by Season breakdown
